

Anterior palate microimplant: A new trend in orthodontics

Samer Mheissen
Private Clinic, Syria

The lecture aim is redirecting the use of microimplant from the interradicular spaces to the anterior palate because it is hard, safe, and more efficient for our intervention.

A new trend of the usage of palatal microimplant is multifunctional like mesialization, distalization and molar intrusion.

My new intervention and use of this trend is control the vertical dimension during functional therapy.

Biography:

Samer Mheissen. D. D. S. Orthodontics. Certifications:

Doctor of Dental Surgery by Damascus University Dentistry School, 2006

Specialized in Orthodontics 2011
